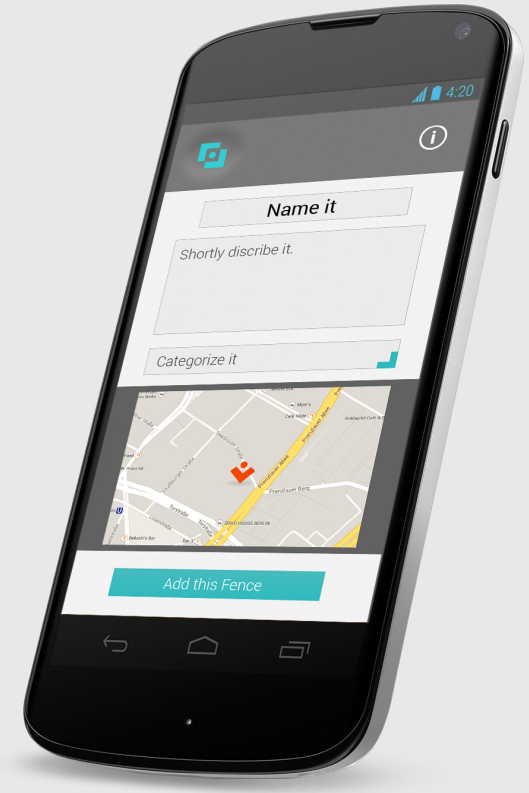
Fency POI points of interest detection and collection app

The idea is

- Create a location based tag for interesting/useful places. (Power public/hidden outlets, free wifi, drinking water sources, hole in a fence for a short cut)
- Pull an info from a point (Tourists info, scavenger hunt game)
- Notifications (Danger places to avoid e.g. riots, police blocks, floods, fires)
- Categorization by relevance and activity detection.
- Sharing and trading the categories.



Fency POI Team:
Ligi, Philip, Andreas, Evgeny

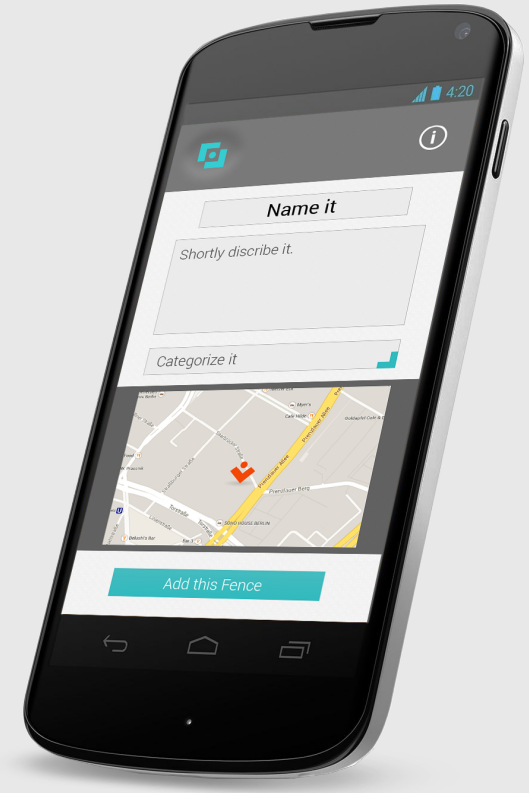
Fency POI points of interest detection and collection app

Technologies

- Newly announced fusion location provider and battery efficient technology Geo Fencing.
- We used GetHub for pushing our code https://github.com/ligi/FencyPOI.
- New fancy development environment "Android Studio IO preview".

We use PayPal for

- Trade valuable POIs. (Sell/exchange my collection to friends)
- Creation of extended features POI.(Government/Local businesses option to inform or advertise) Features: Timeout, Wider area.
- Donations from satisfied users.



Fency POI points of interest detection and collection app

And it's online in very, very early alpha version
